21 February 1962

MEMORANDUM FOR: Assistant Director, CR

SUBJECT: USIB Committee Structure

1. Several elements of the USIB infrastructure have been created to strengthen the reference support to intelligence research. Coordination among these groups has resulted largely through over-lapping membership or the stimulation of a particularly urgent situation.

2. The most general of these support committees is CODIB. However, the scope of this committee has apparently been circum-scribed by the existence of other committees, notably those on Procurement and Exploitation of Foreign Language Publications.

3. Because of their common purpose, I recommend that CODIB, PROCIB, and CEFLP be merged under the name Committee on Information Processing.

4. I further recommend that subcommittees on Procurement, Foreign Language Exploitation, Document Classification, and other related matters be established by and be subordinate to the Com-mittee on ~~Reference Services~~ *Information Processing,*
